FOREWORD

The South Carolina Association of Counties (SCAC) is pleased to provide our county officials with the *FY 2014 Wage and Salary Report*. This year's report presents the results of SCAC's annual survey of 200 positions in county government. A total of 43 counties responded to this year's survey – a response rate of 93.5%. We hope that this report will provide useful information to counties when creating new positions, reclassifying positions, amending pay ranges, or planning budgets.

The report provides detailed wage and salary information by county and position. Wage data is provided for each of the 200 job descriptions and includes number of hours worked per week, the number of employees in the position, the pay range, the midpoint of the range or actual salary, and the percent spread of the salary range. For the purpose of presenting the wage and salary data, the counties are divided into five population groups. Job descriptions, job codes, and job titles are listed on page 223. To assist you in finding salaries for a specific position, the report includes a numeric index by job code beginning on 256.

In addition to detailed wage and salary information, each of the five county population groups begins with a group summary page that includes the 2012 population estimate, current general fund budget, total payroll, and total staff for each county within the group. Further information is provided in a summary statistics section (page 213), which includes statistics for general fund budgets, payroll budgets, and county employment. Also included are annual and sick leave policy information and holiday observances by county.

This publication would not have been possible without the assistance of many county human resource staff persons who took the time to complete and submit survey responses. SCAC would like to thank the county human resource professionals whose contributions are the basis of this report. It is our hope that this biennial publication continues to serve as a valuable resource for county governments across the state.

2014 WAGE AND SALARY REPORT SUMMARY STATISTICS

Population Groups

For the purpose of the FY 2014 Wage and Salary Report, the 46 South Carolina counties have been sorted into five groups based on the latest U.S. Census Bureau county population estimates as of July 1, 2012 (refer to Table 1).

These five population categories are used throughout the summary statistics section for descriptive purposes. Additionally, they are used to group the actual wage and salary data that accounts for the bulk of this report. Population figures are listed for each county in the group summary table that precedes each group's wage and salary data section.

Table 1 Population Groups for FY 2014				
Group 1	Group 2	Group 3	Group 4	Group 5
Over 200,000	100,001 – 200,000	50,001 – 100,000	25,001 – 50,000	25,000 and Under

7 Counties	8 Counties	9 Counties	13 Counties	9 Counties

* Allendale, Darlington, and Orangeburg counties did not participate in the FY 2014 Wage and Salary Survey.

In order to more accurately reflect rapidly changing populations in some counties, the 2014 Wage and Salary Report uses U.S. Census Bureau population estimates to group counties rather than relying on decennial census data used in past reports. Based on the new population grouping method, Jasper County has been reclassified to Group 4.

General Fund and Payroll Budgets

General fund budgets for fiscal year 2014 range from \$194 million to \$5.4 million – a variance of \$188.5 million. Table 2 lists the general fund budget and payroll, not including benefits, for each county. Almost one-third of responding counties have a general fund budget of between \$10 and \$20 million. Five counties (10.9%) report general fund budgets of over \$100 million, while six counties (13.04%) report that their general fund budgets are less than \$10 million. Figure 1 shows per capita averages by population group. Groups 4 and 5, which represent counties with populations of less than 50,000, have significantly higher average per capita general fund budgets than the all-county per capita average of \$397.

Reported payroll budgets, not including benefits, range from \$107.9 million to \$2.5 million. Figure 2 illustrates the average payroll as a percent of budget by population group. Data suggests that, on average, counties with larger populations tend to budget a larger percent of the general fund budget for payroll than counties with lesser populations.

Employment

Full-time and Part-time Employment

Table 3 lists full-time and part-time employment by county for FY 2014. Reported full-time employment ranges from over 2,000 in the largest counties to less than 100 in the smallest counties. The distribution of county full-time employment shown in Figure 3 reveals that over half of all counties participating in the survey employ less than 300 full-time staff.

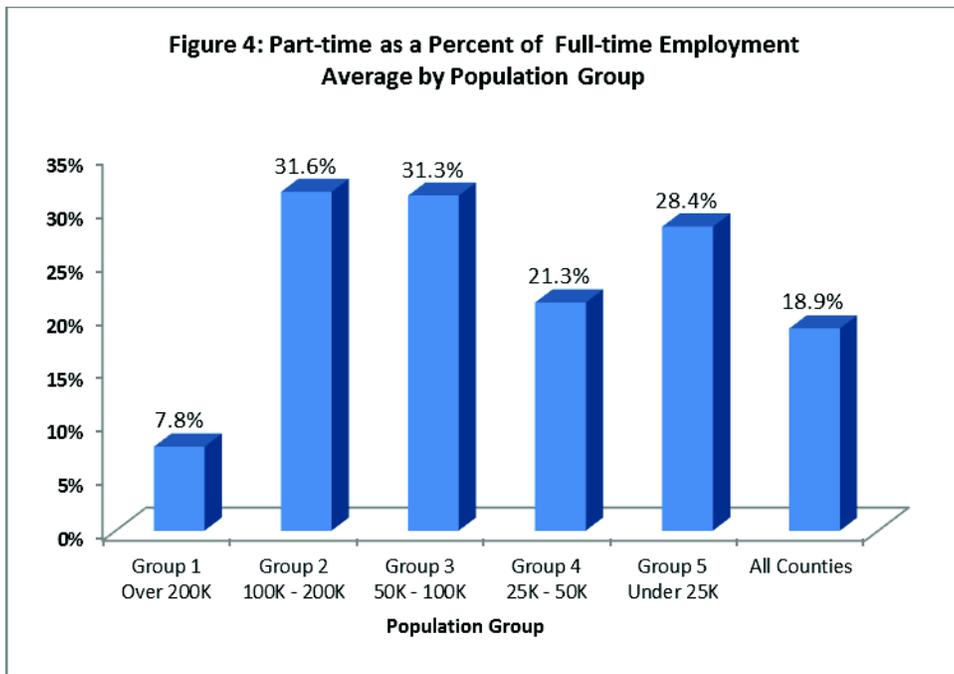

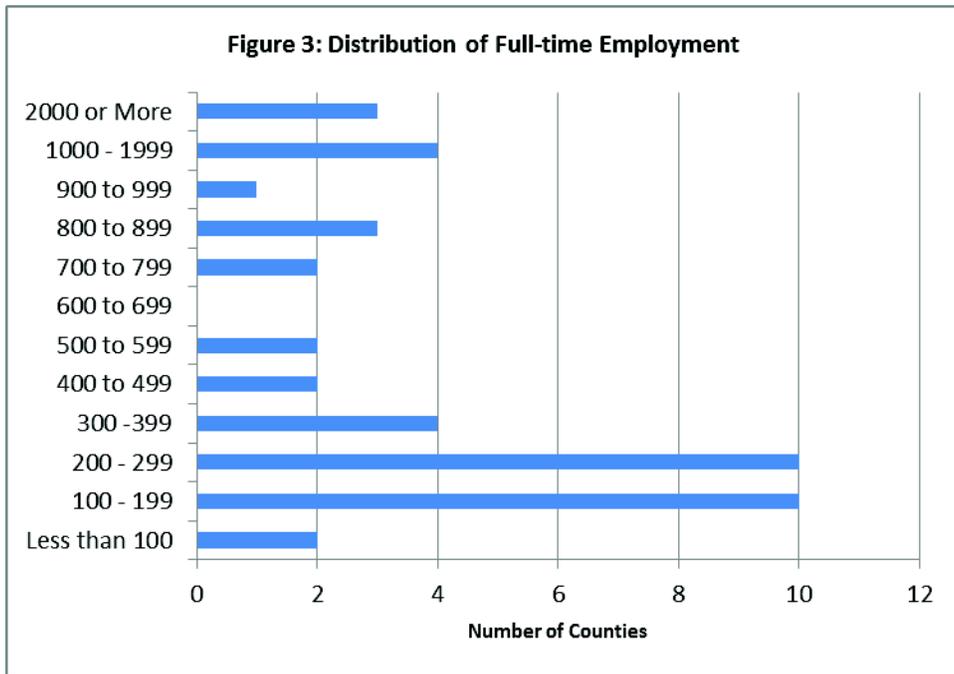

Figure 4 illustrates the part-time employment as a percent of full-time employment by population group. The all-county average for part-time employment is 18.9%, while the average for Group 1 is significantly lower than all other groups. This suggests that counties in Group 1, or the counties with the largest populations, tend to rely less on part-time employment than counties in other population groups.

Law Enforcement Employment

Table 4 lists the reported number of full-time commissioned law enforcement officers employed by county in FY 2014. Only eight counties (18.6%) employ more than 200 full-time commissioned law enforcement officers and two counties (4.6%) employ more than 500. A majority of counties (58.1%) report employing less than 100 officers.

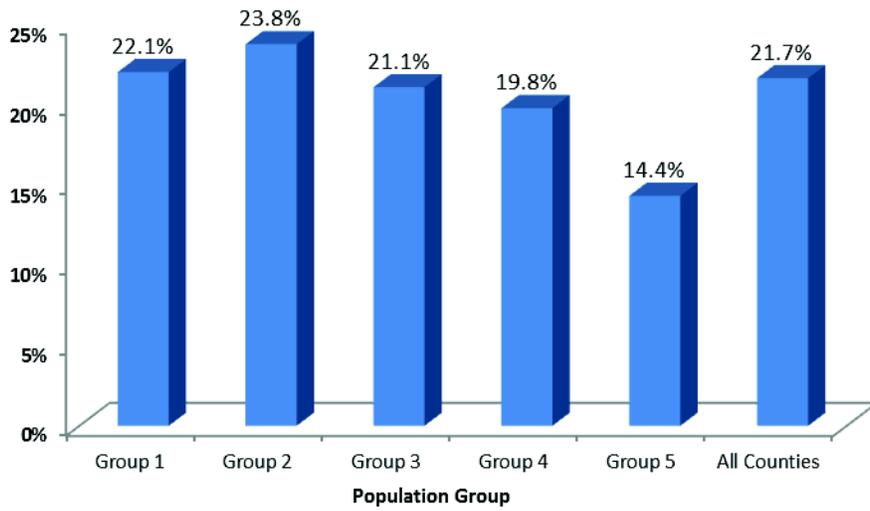

Figure 5 illustrates the average full-time commissioned law enforcement staff as a percent of total full-time employment by population group. Groups 1, 2, 3, and 4 reveal little variation in the proportion of law enforcement officers to total staff. The averages for each group vary less than two percentage points from the state average of 21.7%. However, at 14.4%, the average for Group 5 is somewhat lower than the state average, which suggests that the least populated counties tend to have fewer full-time commissioned law enforcement officers as a percent of total staff than the larger counties.
